WOODESSENCE 10X70

With the new Woodessence collection, Ragno combines the flavour and tactile appeal of two different types of wood: Oak, in three shades (Beige, Grigio and Marrone), and Walnut, in its typical warm, welcoming colours.

The series further extends the offering in the new 10x70 size with very carefully chosen colour shades and wood varieties; instead of the same type of timber declined in an assortment of colours, we have different woods that create hues similar to those of the original product.

A solution that significantly enhances the collection's architectural potential, since it is suitable for different styles, from the most traditional to the most contemporary in terms of laying patterns and colour combinations, with use of the product not only as a floor covering but also as a decorative wall covering feature.

The colour range comprises five shades (Beige, Brown, Grey, Honey and Walnut), where the wood's natural grain and the different types of timber are able to re-create surfaces with deep, warm shades, for the broadest possible compositional and stylistic scope.
